

# Sequel: MGA

Manage end-to-end delegated authority processes, all within one intuitive system

# Sequel MGA

**See and manage your end-to-end delegated authority process. We see a simple, intuitive interface, so that you can concentrate on supporting your business needs.**

## Complete delegated authority management

- Work within a single platform to manage the full delegated authority process
- Improve client service whilst reducing your costs
- Build reports to a bespoke specification
- Deploy new products to go live in just weeks with a fully configurable product builder
- Issue and manage policies with quote and bind capability, removing the requirement to rekey data throughout the process

## A deeper view

### Optimising productivity

- Complete delegated authority management with automated workflow and referrals
- Tasks managed faster and more adequately
- Visualisation of client data in real time
- Distributes products online through a broker network or direct online sales
- Endorsement and renewal workflows
- Intuitive and modern interface

### Enhanced features

- Advanced, configurable automation using a powerful workflow engine
- Dynamic document generation and management, enabling customer self-service
- Integration to the Sequel suite, producing enhanced schedule and claims management
- Implementation of rating rules and conditional questions, supporting simple or complex data capture logic

### Ensuring compliance

- Supports full Lloyd's coverholder reporting standards including v5.2 bordereau production
- Prevent breaches of service levels with SLA tracking
- Range of payment integrations including credit card and premium finance
- Full billing and accounting capabilities, including statements and multi-currency support
